**BOOK LAUNCH
SUSTAINABLE RETROFITTING
OF COMMERCIAL BUILDINGS
6-8.00PM: 5 NOVEMBER 2014**

You're invited

AHMM is a big believer in the benefits of improving the performance of the existing building stock within our cities. Which is why we are excited to join with Simon Burton in inviting you to an event on Wednesday 5 November to mark the release of 'Sustainable Retrofitting of Commercial Buildings: Cool climates' published by Routledge.

About the evening

Introduced by AHMM director Simon Allford, and presentations from contributors including Simon Burton, and architect and lecturer Bill Gething - who collectively, have more than 65 years' experience in the retrofitting of commercial buildings. There will also be an opportunity to see AHMM's sustainability approach in action with a tour of [Morelands Rooftop](#), our London HQ led by AHMM architect Lizi Cushen - also a contributor to the book. Part refurb/part new-build and ranked one of London's highest scoring BREEAM Outstanding buildings, it's a fitting setting for the event. The evening will end with refreshments, continued conversations and a view of fireworks across the city from the rooftop.

About the book

[Sustainable Retrofitting of Commercial Buildings: Cool Climates](#) highlights how existing buildings can be updated so they are energy efficient to run, easy to manage and comfortable to work in. With contributors from developers, surveyors, cost consultants, architects and building physicists, the book discusses the relevant issues that need to be considered in decision-making about sustainable retrofitting. Examples of successful commercial retrofits from the United Kingdom, Norway, the Netherlands, Germany and Belgium are included.
