

28 March 2018

11h00-12h30

European Parliament - Brussels

Room A5G 305

YOUTH EMPLOYMENT AND THE DIGITALISATION OF THE ENERGY RENOVATION SECTOR

Digitalisation is sweeping through the energy renovation sector, from **collaborative robots and virtual reality modelling (BIM)** to **indoor prefabrication, drones & 3D printing**.

- **How can we address the widening gap between rising youth unemployment and an ageing construction sector through an increasingly attractive digitalised energy renovation sector?**
- **Which opportunities in the MFF can support SMEs and equip the next youth generation with the technical skills to face this challenge?**
- **What is the potential to improve working conditions, increase productivity, reduce construction costs and improve the energy efficiency of buildings?**
